

OUTDOOR FLORIDA WEBINAR SERIES

Join us for a discussion about recreational wetlands with Mark Sees, manager of Orlando Wetlands. Orlando Wetlands provides advanced treatment for reclaimed water from the City of Orlando while also serving as a recreation space with opportunities for hiking, bicycling, and wildlife viewing. In recent years, the wetlands were awarded an FDEP Recreational Trails Program grant which allowed for the construction of a boardwalk to enhance the recreation experience. Learn how property facilitates water filtration, the challenges and opportunities that come with managing a multi-use space, and more.
